DETAILED ACTION

And

EXAMINER'S REASONS FOR ALLOWANCE

1. Claims 1, 3-10, 12-19 and 21-26 are allowed.

Definition

2. The Examiner notes that the term "*anisotropic substrate*" is defined as "*A substrate whose electric or magnetic properties, or both, are directionally dependent.*" See IEEE 100, "The Authoritative Dictionary of IEEE Standards Terms, Seventh Edition, page 39.

Examiner's Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:
 - 3.1 The following limitations are allowed for at least the reasons being cited,
 - 3.2 As regards independent claims 1, 10 and 19 and using independent claim 1 as an example, the following limitations, in combination with other limitations are neither anticipated nor made obvious by the prior art, "*comparing empirical log data obtained with the second well tool disposed within the borehole against the simulated log data to determine a resistivity anisotropy profile of the formation.*" A "*anisotropic profile*" of a formation, in this case a geologic formation, as measured using a first well tool and a second well tool, and then comparing the resultant data, as expressly claimed by the Applicant and argued by the Applicant in the 11/28/2005 responses, is not disclosed in the prior art. Specifically, the meaning of the term "*anisotropic profile*" can only refer to a profile where the analyzed data is data that results from the changing position of the well tool in the borehole relative to the geologic formation and

therefore the resultant "*anisotropic profile*" would provide different data models from the data models that are disclosed in the prior art.

The combination of the Applicant's instant amendments to the claims and arguments presented in the 11/28/2005 responses have been, in combination, persuasive and the Examiner withdraws all previously applied prior art rejections.

3.3 Dependent claims 3-9, 12-18 and 21-26 are allowed for at least the reasons that they depend upon an allowed base claim.

3.4 Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent 6,304,086 discloses methods of collecting data using a dual laterolog collection tool placed in a borehole, (Figure(s) 3-9).

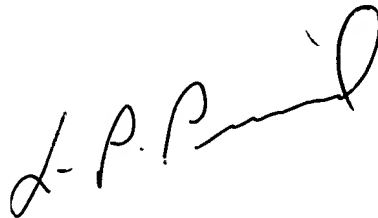

4.1 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dwin M. Craig whose telephone number is (571) 272-3710. The examiner can normally be reached on 10:00 - 6:00 M-F.
